

GENERATING SHARED SUCCESS.

ROTTERDAM OFFSHORE WIND COALITION.

ROTTERDAM. MAKE IT HAPPEN.

NICE TO MEET YOU.

As Europe's **leading offshore cluster**, we join forces in business and innovation towards a sustainable society. In Rotterdam, the world's smartest port and one of Europe's most exhilarating cities, you can find a **pioneering coalition of leading companies**. That is what we call: **generating shared success**.

LEADING OFFSHORE CLUSTER.

Our offshore cluster has all the know-how and necessary infrastructure to deal with the largest, heaviest and most advanced offshore projects. Rotterdam is home to Europe's largest fleet of floating cranes and sheerlegs. On top of that, all companies are dedicated to provide their (offshore) customers with the best service possible, therefore we join forces in business and innovation.

PIONEERING COALITION OF LEADING COMPANIES.

Companies join forces in creating business and innovation. Each of us are renowned for our expertise and state of the art technology and services. Just imagine what we are able to provide to our customers. Not a single project is too big, too complex or too challenging to handle.

GENERATING SHARED SUCCESS.

Our coalition is formed on a 'shared success' basis. We combine business and innovation and generate new offshore energy. Not only do we generate energy. We also generate shared success. For our customers, for our members and - last but not least - our society. Together we move towards a sustainable society.
